

Monitor every client's entire IT infrastructure, proactively remediate issues, and help clients improve their IT health and achieve smarter performance.

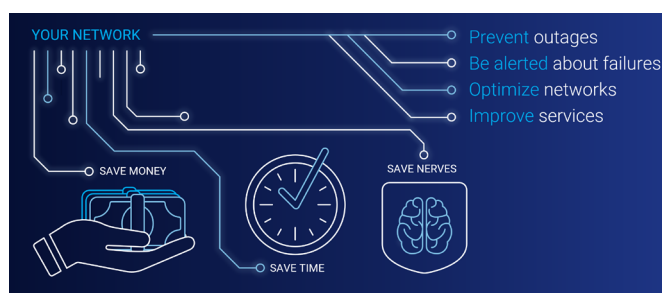

Key features

- A centralised dashboard monitors all client IT environments in one place
- Proactive alerts with custom thresholds detect IT health issues quickly
- Integrates with networking vendors like Cisco, VMware and more
- Streamlines monitoring for increased operational efficiency
- Customisable settings can be tailored to client needs
- Simple to deploy with clear licensing and easy installation
- Spot hardware, software and service upgrades for clients
- Intelligent reporting and data empower you to offer trusted advice

Why partner with Paessler?

Comprehensive monitoring of IT environments is crucial. As digital infrastructures expand, businesses need specialised tools and advisors to keep their systems running optimally.

Paessler Router Traffic Grapher (PRTG) offers an expert monitoring solution that provides real-time visibility across entire IT environments, including IT, OT, and IoT infrastructure. Track service levels, performance and system health, and proactively identify, prevent and resolve issues for clients before they escalate. PRTG is a scalable, simple-to-deploy platform that enables you to differentiate yourself in a competitive market through a service-led offering that boosts customer trust and provides ongoing opportunities to strengthen and support your clients' IT.

Challenges Paessler solves

A proactive approach to IT is critical to keep businesses operational and IT environments healthy. PRTG gives your clients complete peace of mind, providing a complete picture and intelligent insights into their IT infrastructure. Built-in sensors provide immediate device status updates and alerts, and the centralised dashboard allows for easy monitoring and management of multiple environments.

Opportunities for MSPs

Through Paessler, MSPs can strengthen SLAs, minimise downtime with early alerts and intelligent diagnostics, and deliver high-value, recurring revenue-boosting services. The actionable insights position you as a go-to advisor, helping to reduce disruptions, optimise performance, and identify potential gaps, opening up conversations around additional tools and services.
